

Director of Operations

The Director of Operations oversees management of all areas of manufacturing to ensure products are manufactured on schedule and within quality standards and cost objectives.

Key Responsibilities

- Manage effective operation, direction, and development of Manufacturing, Materials, Scheduling, Shipping, and Quality.
- Direct and monitor department managers to accomplish departmental objectives.
- Drive quality, delivery and cost improvements to meet or exceed company objectives.
- Develop procedures for maintaining high standards in manufacturing operations to ensure that products conform to quality standards.
- Ensure compliance with company standards for cost control, waste reduction, quality, safety, and on-time delivery at the lowest possible cost.
- Reduce freight, rework and warranty costs.
- Drive continuous improvement and consistency in processes.
- Provide the organization with a safe work environment and the means whereby quality products can be produced on-time and for the lowest reasonable cost possible.

Education, Experience and Skills

- Minimum bachelor's degree (Engineering, Business, or related Field).
- Minimum 5 years management experience directing manufacturing operations.
- Excellent oral and written communication and presentation skills.
- Experience in the Broadcast or high power electronics industries preferred.
- Proven track record of progressive accomplishment.
- Skilled in Lean principles and techniques.
- Ability to travel as required.
